#### Module Description

The Thematic Unit aims to highlight the need to take business initiatives that emphasize environmental awareness, with a simultaneous reference to the advantages promoted by green entrepreneurship with the ultimate goal of managing / limiting the environmental impacts resulting from the activities of small businesses and medium-sized enterprises (SMEs). Considering the fact that the business environment of SMEs is changing due to the very important environmental issues including climate change and the overexploitation of natural resources, while at the same time environmental legislation is becoming more and more strict, the conversion to environmentally friendly products and services becomes imperative. In this Thematic Unit, students are introduced to the procedures for determining green entrepreneurship through standards that will be developed such as CSR, environmental management systems, green contracts, etc..
